

**Antifreeze** – Antifreeze contains chemicals that can be poisonous to humans and animals.

***Reduce*** – Purchase only the amount you need.

***Reuse*** – Antifreeze can be recycled by bringing it to a facility that is set up to collect it. There are now seven sites in the county that accept antifreeze. Do not mix with oil or other solvents. Contaminated antifreeze must be brought to a household hazardous waste collection site. Collection drums are marked for the appropriate type of antifreeze: Ethylene Glycol, Propylene Glycol, and Dex-Cool.

See [Household Hazardous Waste Collection](#).

**Businesses:** Antifreeze should be treated as hazardous waste. See [Clean Shop Collections, Hazardous Waste, and VSQG](#).

Used Antifreeze can be recycled at the following locations:

- Aurora Transfer Station – 6910 Hwy 135 N., Aurora
